

PERA TILE

stone

PERA TILE

Pera Tile was founded in 2010 in California with the vision that there was more to natural stone than the standard field tiles and mosaics that the designers and home owners could find at every corner. We came out with a design-forward yet affordable stone program complete with tiles, mosaics and trims sourced from different corners of the world.

Since then, we've expanded our portfolio to include porcelain, ceramic, hardscapes, in-house custom fabrication and waterjet capabilities in addition to natural stone.
